Name of Supervisor Notified: Sgt. Moore

Summary of the action taken, by the officer(s) involved:

While attempting to handcuff the suspect he continued to fight with us. He then bit me in the left calf, still fighting and was very uncontrollable. I deployed my taser to the mid back at close range, then placed the taser to his right calf to complete a circuit. Officers did gain compliance and was able to handcuff him during the 5 sec cycle. The suspect continued to fight thrashing around and was given a second cycle that did not gain any compliance. Officers continued to wrestle with the suspect just trying to keep him still and hold him down so not to injure himself. The suspect did calm down and we noticed that he appeared to have a medical problem at this time. We rolled the suspect over, felt for a pulse which was strong and fast, and his chest was rising and falling. We advised dispatch that we needed EMS and to advise to step it up. We continued to feel for a pulse and waited for EMS. As EMS arrived the suspect lost his pulse.

Application Data

Which type of Advanced Taser was used? ☐ M26 ☒ X26

Advanced Taser Serial #: X00-445350

Cartridge Serial #(s): 101 tagged it

Number of cartridges fired: 1

Number of probe contacts: 2
